CASE STUDY

MDDHOSTING LLC

EMAIL SECURITY IN THE CLOUD OR ON-PREMISES

INCOMING » OUTGOING » ARCHIVING

Local Cloud » SaaS Managed Email Security on your own premises
» Incoming & Outgoing Filter » 4-tier Control » API » Clusterable »
Synchronized » Scalable

In the past year, the most sophisticated malware authors upped the stakes with new business models and software paradigms to build more dangerous and sustained attacks. Malware creators constantly seek to maximize their return on investment by finding ways to reach the largest population of potential victims with the least effort, and they often take advantage of cross-platform technologies when possible.

In the wake of these growing risks, organizations need aggressive, far-reaching protection. SpamExperts provides email security solutions spanning all major email threats, specializing in Incoming Email Filtering (for spam and viruses protection), Outgoing Email Filtering (for IP reputation and blacklisting prevention) and Email Archiving (for back-up and compliance). As new email security requirements emerge, SpamExperts systems are automatically updated with new capabilities to ensure against new spam and viruses outbreaks. SpamExperts Email Security Services are available in the cloud or installed on the client's local hardware.

Quick Read

MDDHosting is a privately owned company, formed in 2007, which provides webhosting services at affordable prices for individuals and businesses around the world. The company mission is to provide high quality services and support for each and every one of its clients.

Challenges

The largest issue MDDHosting had to deal with, prior to working with SpamExperts, was the significant loss of human resources in manually dealing with inbound and outbound spam filtering, whereas the high amount of man-hours could have been put to better use.

Customer profile

Company	MDDHosting LLC
Location	Indiana, USA
Industry	Webhosting
Number of filtered domains	1.000 Incoming domains 10.000 Outgoing domains
Products in Use	Local Cloud, Incoming and Outgoing Filter
Website	http://www.mddhosting.com

Implementation

CEO Michael Denney was the winner of the SpamExperts innovative give-away package at HostingCon 2014, the premier industry gathering and trade show for hosting and cloud providers in the USA. The package included a license of 1.000 domain Incoming and Outgoing email filtering. MDDHosting chose the Local Cloud deployment, due to it using distributed rule sets which are more effective than the rules created via their own direct experience with spam.

Benefits

In just few months from winning the software package from SpamExperts at HostingCon, our solutions positively impacted MDDHosting's long term business success by allowing management to better plan its resources and spend less time investigating spam issues and maintaining the system. Thanks to SpamExperts filtering solutions, MDDHosting internal human resources can now be productive without further deviation from the main goal.

Target Reached

“Before SpamExperts we wasted time and money in trying to deal with spam. Now we can focus on our core business and keep our customers happy.”, said Michael Denney, CEO of MDDHosting.
