XXL WEBHOSTING

EMAIL SECURITY IN THE CLOUD OR ON-PREMISES

INCOMING » OUTGOING » ARCHIVING

Local Cloud » SaaS Managed Email Security on your own premises » Incoming Filter » 5-tier Control » API » Clusterable » Synchronized » Scalable

SpamExperts solutions are tailor made to suit the needs of Web hosts, ISPs/Telcos and large organizations, as well as Resellers and Distributors. Having full Inbox protection at network level will help companies save significant resources, and keep end-users happy and in full control through the user-friendly SpamPanel administration interface.

Quick Read

XXL Webhosting is a customer focused hosting provider based in the Netherlands. Their aim is to let their customers be successful online. The company was founded in 2000 and currently manages over 40.000 websites. They differentiate by offering high quality hosting services combined with a personal, pro-active and friendly service.

For more information, please visit their [website](#).

Challenges

Spam was a big problem especially for their customers, who were looking to have spam-free mailboxes and expected the highest quality service from their provider. Prior to using SpamExperts, they used an in-house developed anti-spam platform. As it soon proved to be inefficient, once XXL Webhosting team spoke with a SpamExperts representative, they immediately implemented Incoming Filtering in the Local Cloud.

Implementation

XXL Webhosting has been a client since 2015. They are currently using SpamExperts for inbound spam filtering for a large part of their email accounts. The reason the web host switched from their in-house solution to SpamExperts is because they were

looking for more accurate spam filtering, better integration options using the API, more advanced self-service options for their customers, and better reporting functions.

Benefits

The Incoming Filter has significantly helped lower the amount of spam received and has saved XXL Webhosting time and money. As fewer resources are lost through manual adjustments of the filter, the team can now focus on bringing more value-added services to their end-customers. SpamExperts is a professional and reliable product which reduces two challenges: the increasing amount of spam not being effectively filtered by the standard solutions

“SpamExperts helped us with the initial installation and configuration of the anti-spam solution, and has provided us with great advice and support both before and after the implementation,” said Sander Cruiming, company Founder.

Target Reached

“We looked for a solution that could replace our in-house developed anti-spam platform. Our needs consisted of more accurate spam filtering, better integration and self-service options for our customer portal, and better reporting functionality. SpamExperts exceeded our needs and offered the perfect email security solution to serve our customers in a better way,” explained Cruiming.
